Laicity and Freedom of Belief in Italy: Reports, Suggestions, Evidence Presentation of FOB (European Federation for Freedom of Belief)

Rome, Monday 21th december 2015, 10am

Palazzo Montecitorio. Sala del Mappamondo - Piazza di Montecitorio, 00186 Roma

FOB (European Federation for Freedom of Belief) is a European non-party and non-denominational federation, composed of associations founded in different member States of the European Union, created to support freedom of religion and belief.

We are glad to invite you to the Conference in which the Federation means to present its own activities and aims to the Italian public opinion. Our purposes substantially fit in the support to the FORB program passed by the European Union.

During this meeting reports and suggestions by FOB will be investigated; wide room will be given to the speeches from people who have been involved with and committed to the defence of religious freedom for decades. Moreover evidence of cases in which such fundamental freedom has been seriously violated will be provided. Final aim is to let citizens become aware of the actual situations within this field giving them the knowledge and information needed to promote and sustain the respect of fundamental human rights.
